## Work Experience

### Software Engineer, The Washington Post (The Post)

Feb 2022 - Present

- Develops and maintains all media components across The Post's website, including the photo gallery and audio and video players, ensuring that they are scalable, reliable, and efficient.
- Created the "Sticky Player" for articles and podcasts and integrated it across The Post's website, resulting in a 12% increase in user engagement in the first 6 months.
- Led the development of the Orca player, a new and improved video player that is faster, lighter and more consistent with The Post's design system, resulting in a consistent rise in video views over Q3 of 2023.
- Conducts interviews and acts as mentor for junior engineers and interns, fostering their growth and ensuring that their code conforms to the Post's standards.
- Ensured that our repositories remained modern by leading the team to adopt TypeScript, making repositories easier to maintain, contribute to, troubleshoot, and onboard new team members.

### Cogent Infotech, Software Consultant

#### Software Engineer, Lowe's

Feb 2021 - Feb 2022

- Developed and maintained RESTful microservices in Spring Boot and Java 12 for the vendor gateway website.
- Collaborated with Forgerock to implement OAuth2 authentication for enhanced account management and login experience.
- Monitored and debugged applications across different environments using Kibana and Grafana.
- Worked with the Akamai team to provide pathing for REST routes, resulting in speed improvements for user navigation.
- Monitored CI/CD pipelines and deployed applications with Spinnaker and GCP.

### Full Stack Developer, Caterpillar (CAT)

Nov 2019 - Dec 2020

- Collaborated within Caterpillar Asset Intelligence (CAI) division to manage microservice APIs.
- Created full-stack .NET applications with Angular framework to support CAT's Remote Fleet Vision for ship tracking.
- Developed and implemented observer and visitor design patterns to create an object-based data structure to maintain ship data.
- Worked with Kibana and New Relic to triage production issues and provide quick resolution to app issues and bugs.

## Education

**Master of Science (MS) in Computer Science**, Kennesaw State University

**Bachelor of Science (BS) in Computer Science**, Amity University

## Skills

**Software & Frameworks:** React, Spring Boot, SQL (Postgres), NoSQL (Couchbase, MongoDB), Maven, Git, Vercel, AWS, GCP, Docker, Kubernetes, Svelte, Stitches.js, Tailwind

**Programming Languages:** Javascript (ES6), TypeScript, Java 13, Python
